Arga Pratama

Fullstack Software Engineer

Jakarta, ID | 62853-9776-2752 | argapratamaman052@gmail.com | argapratama.netlify.app | github.com/Argapr

Objective

Fullstack Software Engineer with hands-on experience building web and mobile applications across frontend, backend, API integration, and cloud deployment. Experienced in developing loyalty and rewards platforms, integrating payment services, and delivering scalable, configuration-driven solutions for multiple business partners. Comfortable working with React/TypeScript, Laravel/PHP, React Native, Flutter, and Google Cloud Platform. Focused on building reliable, maintainable software while continuously exploring new technologies and improving development efficiency.

What I love to do:

- Building reliable and scalable web and mobile applications from the ground up.
- Turning ideas and real-world problems into practical digital solutions.
- Working across frontend, backend, APIs, and deployment to build complete products.
- Creating intuitive and consistent user experiences through thoughtful UI implementation and reusable components.
- Exploring new technologies and development approaches to continuously improve productivity and efficiency and performance

Experience

PT. Eco Paper Indonesia | IT Support Internship **Mar - Jun 2024**
Subang, Indonesia

- Installed and configured LAN infrastructure across 3 departments.
- Deployed and managed CCTV systems using IP-based tech.
- Conducted periodic PC maintenance, improving system uptime by 20%.

PT. Jerbee Indonesia | Web Developer Internship **Jan - Mar 2024**
Bandung, Indonesia

- Developed Q&A and admin management features for Nesaseskul using React and Firebase.
- Cleaned and preprocessed data for web-based statistical analysis.
- Conducted A/B testing and interpreted statistical results to support feature decision-making.

PT. Dompet Aman Indonesia | Fullstack Software Engineer **Nov 2025 - Present**
Jakarta(SCBD), Indonesia

- Contributed to building the company's loyalty and rewards platform from the ground up, now used by multiple business partners through dedicated partner interfaces.
- Developed and maintained Full Stack web applications, working across frontend, backend, REST APIs, and database integration.
- Implemented payment and authentication integrations, including multiple payment methods and Google Sign-In, to provide a seamless user experience.
- Developed rewards, points, and voucher redemption features, enabling users to earn and redeem benefits across various merchants.
- Integrated and maintained third-party services and APIs, including Xendit, to support payment-related functionality.

- Managed application servers and deployment environments on Google Cloud Platform (GCP), including server configuration, SSL/HTTPS, and application availability.
- Collaborated with product, design, and engineering teams to deliver new features and maintain the reliability of production applications.

Education

SMK Negeri 1 Subang **2022 - 2025**
Major: Software Engineering

Skills & abilities

Technical Skills

- **Frontend**: HTML, CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap, Vite
- **Mobile**: React Native, Expo, Flutter
- **Backend**: Node.js, Express.js, PHP, Laravel, CodeIgniter.
- **Database & Backend Services:** MongoDB, MySQL, Supabase.
- **API & Integration:** REST APIs, Authentication & Authorization, Xendit.
- **Cloud & Deployment:** Google Cloud Platform (GCP), Apache, SSL/HTTPS, Server Deployment.
- **Tools & Other**: Git, GitHub, GitLab, Git Bash, Postman.
- **Concepts**: Atomic Design, UI/UX Principles, Responsive Design, Reusable Components.

Soft Skills

- Strong problem solving and debugging skills across web and mobile development.
- Ability to design and implement clean, maintainable, and scalable solutions.
- Effective collaboration with designers, backend engineers, and product teams.
- Adaptability to new technologies, frameworks, and development environments.
- Strong attention to detail in UI implementation and user experience.
- Ability to work across frontend, backend, API integration, and deployment.
